SOUTH
BIRD

DAKOTA
NOTES

VOL. 50

DECEMBER 1998

NO. 4

SOUTH DAKOTA BIRD NOTES, the official publication of the South Dakota Ornithologists' Union (organized 1949), is sent to all members whose dues are paid for the current year. Life members \$200.00; Family life members (husband and wife) with 1 subscription to *Bird Notes* \$270; sustaining members \$20.00, regular members \$12.00; family members (husband and wife) with 1 subscription \$16.00; juniors (10-16) \$6.00; libraries (subscription) \$12.00. Single and back copies: Members \$3.50, Nonmembers \$4.00. All dues payments, change-of-address notices, and orders for back copies should be sent to the Treasurer, Nelda Holden, 1620 Elmwood Drive, Brookings, SD 57006. Manuscripts for publication should be sent to Editor Dan Tallman, NSU Box 740, Aberdeen SD, 57401, or to Tallmand@wolf.northern.edu via E-mail.

SOUTH DAKOTA ORNITHOLOGISTS' UNION
Officers 1998 - 1999

President	Jeff Palmer, 821 NW 5 th Street, Madison 57041
Vice President	Robb Schenck, 422 N Linwood Ct., Sioux Falls 57103
Secretary	David Swanson, USD, Vermillion 57069
Treasurer	Nelda Holden, 1620 Elmwood Drive, Brookings 57006
Editor	Dan Tallman, NSU Box 740, Aberdeen 57401
Librarian	Robb Schenck, 422 N Linwood Ct., Sioux Falls 57103

Elected Directors

- For Term expiring 1999: Dale Droge, Madison; Esther Edie, Brookings; Todd Jensen, Rapid City; Travis Hills, Crooks; Robb Schenck, Sioux Falls.
- For Term expiring 2000: John Haertel, Brookings; Eric Likness, Vermillion; Ernie Miller, Sturgis; Richard Peterson, Midland; David Swanson, Vermillion.
- For Term expiring 2001: Gertrice Hinds, Prairie City; Jeffrey Palmer, Madison; Rosemary Draeger, Sioux Falls; Dan Tallman, Aberdeen; Duane Weber, Custer.

Past President Directors

Jocelyn L. Baker, L. M. Baylor, Gilbert Blankespoor, Robert Buckman, Ken Graupmann, Cecil Haight, Byron Harrell, Bruce Harris, Nelda Holden, Rex Riis, Dennis Skadsen, David Swanson, J. David Williams.

Associate Editor: Erika Tallman

PRESIDENT'S PAGE

We all enjoy birding for a variety of reasons. Keeping an annual list is one exciting and even challenging way to participate in the sport. Having observed 291 species in the state during 1995, I decided in 1997 to make a serious attempt at a 300 species annual list for South Dakota.

January is the month of beginnings. Every species is new and hence can be relished again as if for the first time. My year got off to a good start with sightings of a Northern Hawk Owl, Pine Grosbeak, and Common Raven ... in northern Minnesota! Upon my return to South Dakota, however, I was pleased to find that the **Varied Thrush** (the only one I would find all year), first located on the Madison CBC in December, was still present at a feeder in town. A three-day trip to Pierre in the middle of the month yielded the first Snowy Owl, Glaucous Gull, and Greater Prairie-Chicken of the year. These species I would see again. A serious annual list is rarely an individual effort and over the course of the year I had a lot of help from many people. In particular, Robb Schenck and I spent considerable time birding together during the year. Robb was directly responsible for many of the "good" birds that I would see. So it began with a phone call on the evening of 29 January. The next morning I was in Sioux Falls bright and early birding with Robb; a little after 8 AM we found the **Great Gray Owl** that he had found the day before. This, the first confirmed sighting of a live bird in the state made a very nice birthday present for me. Through January my Annual List totaled 48 species.

The winter of 1996-97 was one for the record books. Most of South Dakota looked like the arctic tundra. In February, I managed a little local birding and a visit Hartford Beach State Park but had little success. Red Crossbill and Common Redpoll brought my annual list to 50 species.

With March comes spring and hope for the frozen birder trapped on the South Dakota tundra for the previous four months. Early in the month, I headed west to the Black Hills for the first time during the year. A stop at Badlands National Park to search among the junipers for a Long-eared Owl was unsuccessful, but I observed a small flock of **Bohemian Waxwings** foraging in the vicinity of Cedar Pass. At Lacreek National Wildlife Refuge I picked up my only **Trumpeter Swan** of the year. The following day, I found a **Pygmy Nuthatch** visiting a local feeder in Custer, a **Black-backed Woodpecker** tapping away near Mount Coolidge and a Three-toed Woodpecker at Sylvan Lake. Day three of the trip produced the resident **Barrow's Goldeneye** on Canyon Lake and the following morning a single **Sage Grouse** was seen dancing on the snow covered grasslands in northern Butte County. Local birding and the usual assortment of early spring migrants brought my annual list to 87 species by the end of March.

April is a transition between Spring and May. As the ice breaks from the many ponds and lakes in the region, large flocks of gulls gather to feast upon the winterkill. A **Lesser Black-backed Gull** stood out among the crowd gathered on Lake Herman early in the month. Toward the end of the month, Sand Lake National Wildlife Refuge held a **Ross' Goose** and several **Red-necked Grebes** were found at Waubay. By the end of the month my Annual List had grown to 136 species.

Ultimately I knew that the success or failure of my quest for 300 depended on the month of May. A late **Winter Wren** at Lake Herman State Park, a **Merlin**

in Kingsbury County, and a **Ruff** in Baltic (another phone call from Robb) was a good enough start early in the month but ... where were the warblers? Union County State Park produced a Blackburnian, Magnolia, and Chestnut-sided on Sunday of the Spring SDOU Meeting bringing my total to a dismal 14 for the spring. And then (just like the blizzards of the previous winter) it hit ... beginning with our Big Day on 19 May, the best two weeks of birding I have ever experienced in South Dakota! I will continue this account in the next issue of *Bird Notes*. Jeffrey S. Palmer, College of Natural Sciences, Dakota State University, Madison, SD, 57042.

Special Offer from SDOU: new members receive a free copy of "Birds of South Dakota" – a \$29.95 value!

FIRST SOUTH DAKOTA RECORD OF VIRGINIA'S WARBLER

Jeffrey S. Palmer
Dakota State University, Madison, SD 57042

A few years ago, I learned from Richard Peterson, author of *A Birdwatchers Guide to the Black Hills and Adjacent Plains*, that the Redbird Canyon area contained some of the best remaining Mountain Mahogany (*Cercocarpus montanus*) in South Dakota. In Washington, this habitat harbored Green-tailed Towhees and I was interested in looking for one in South Dakota. Redbird Canyon is located in extreme western Custer County. Follow Highway 34 west until you cross the state line and enter Wyoming. Take the first road to the right (north) and after a short distance you will return to South Dakota. One mile farther there is a fork in the road; right takes you up Redbird Canyon (FR 376) and left follows Boles Canyon (FR 117). If you continue up Boles Canyon, watch for the first gravel/dirt road to the left and you can enter Roby Canyon (FR264).

My first visit to Redbird occurred on 19 May 1996 during the SDOU Spring Meeting in Custer; no Green-tailed Towhee. My next visit to the area came on 19 August 1996. Approximately one mile up Redbird Canyon, I observed a "drab grayish warbler, no wing bars, bright yellow undertail coverts, distinct white eye ring, bobbed tail repeatedly, no yellow observed on throat/breast ... Virginia's Warbler?" I knew Virginia's Warbler could be found 130 miles southeast in Casper, Wyoming. I was also aware that it could represent a First Record for South Dakota (a prior Virginia's Warbler was reported 30-31 May 1977 from Wind Cave National Park (SDBN 42:10-14)). However, since I could not entirely rule out a Nashville Warbler (also considered accidental in the Black Hills), the bird was not added to my list that day. I did however report my suspicions to the other Rare Bird Records Committee members at our fall meeting.

On 1 July 1997 I returned to Redbird, still looking for that Green-tailed Towhee. I was not thinking about Virginia's Warbler. Approximately 0.15 miles up Redbird Canyon, I investigated a patch of Juniper and Ponderosa Pine on the cliff to the left of the road. This looked like a good spot, but no luck. However, I did observe a pair of Blue-gray Gnatcatchers (my only previous sighting in the Black Hills was of a single individual along the Wildlife Loop Road approximately 0.5 miles south of French Creek in Custer State Park on 29 July 1991). Approximately 0.25 mile farther up the road, I stopped at a small box canyon to the left; as I was "spishing," I flew a beautiful male Virginia's Warbler. I observed the bird for 15 to 30 seconds as it flitted in and out of the surrounding brush approximately 15 to 20 feet away and noted the following: generally gray warbler, distinct and bold white eye ring, lemon yellow undertail coverts, and distinct yellow patch on upper breast only. I did not observe the reddish cap (described in field guides as hard to see) or the yellowish green rump, or the tail bobbing. After my brief observation, the bird disappeared, although I could still hear it singing farther up the box canyon. I'm not good at describing bird songs, but to me this bird sounded like a rapid and perhaps accelerating *chu-chu-chu-chu-chu*. I added Virginia's Warbler to my list and continued the search for that elusive Green-tailed Towhee.

I found Virginia's Warblers at two additional locations in Redbird Canyon that day. No additional field marks were seen at this time. Two days later, while birding in Hot Brook Canyon, Fall River County (another extremely interesting and not often enough visited birding spot in South Dakota) I visited with Richard

and Juanita Peterson and told them of my finds. Even though Richard was admittedly skeptical, I was not the least surprised to find them early the next morning when I visited Redbird Canyon again. On my way in I had stopped to observe the gnatcatchers again and saw one in the same location it had been a few days before. When Juanita, Richard, and I returned to this spot they were not to be heard or seen for about 5 to 10 minutes. We finally found one in the next habitat "patch" to the west. Farther up Redbird Canyon, it didn't take long to find the Virginia's Warbler. After climbing the hillside toward a singing bird, we played a tape to which the bird responded nicely. All three of us were able to observe the field marks noted earlier as well as the reddish cap. Later that morning, I headed up Roby Canyon and was able to observe and/or hear at least six more Virginia's Warblers at four different locations, including one very agitated pair. I strongly suspected that they were nesting in the area. The birds in Roby Canyon were more accessible from the road than the birds in Redbird Canyon and I was able to get much longer and more detailed looks at them including the yellowish rump and tail-wagging behavior. Altogether, in Redbird and Roby Canyon I saw or heard at least nine Virginia's Warblers in at least six different locations.

How long have they been present? A Breeding Bird Survey Route runs through Roby Canyon and the area was included in the South Dakota Breeding Bird Atlas. However, it would be easy to overlook a bird that you do not expect to find. Unexplored country in southwestern South Dakota includes Redbird Canyon, Roby Canyon, Hot Brook Canyon, and many other locations. Just what might be found with more frequent visits to such spots? In Redbird and Roby Canyon, to which I will return whenever I visit the Black Hills, I'll be keeping an eye and ear open for such things as Black-throated Gray Warbler, Bewick's Wren, Black-throated Sparrow, Plain Titmouse, and that elusive Green-tailed Towhee.

GENERAL NOTES

PINE SISKIN AND "OREGON" JUNCO BANDING RECOVERIES.

Andrew Zickur in Melby, Minnesota, recovered a Pine Siskin that I banded in Aberdeen, South Dakota. Because the bird was banded on 24 November 1993 and recovered sometime during July 1998, the bird was at least slightly over 4.5 years old. Figure 1 is somewhat misleading, since the bird's exact path from Aberdeen to Melby (Melby is about 25 miles SE of Fergus Falls, MN) is unknown and more than likely involved much larger north or south migrations. Seven-year-old siskins are known from the wild and a captive Pine Siskin lived to be 11 years (Torres, *The Audubon Society Encyclopedia of North American Birds* 1980. Alfred A. Knopf: New York).

Figure 1. Siskin recovery.

"Oregon" Juncos, which are Dark-eyed Juncos with dark hoods, pink sides, and brown backs, are relatively uncommon in the Aberdeen area. I band only a few each winter. This type of junco breeds in Alaska and southwestern Canada south through the Pacific coast states to Baja California. On 17 October 1998, I was surprised to recapture an Oregon Junco that I had first banded on 21 January 1998. This recovery demonstrates a remarkable wintering site fidelity for a race of junco one might expect to be more of a vagrant to eastern South Dakota. *Dan Tallman, Northern State University, Aberdeen, SD 57401.*

WOOD DUCKS BREEDING AT RAPID CITY. During the 1998 breeding season, two female Wood Ducks produced ducklings at Canyon Lake Park in Rapid City. A front-page picture in the *Rapid City Journal*, 9 June 1998, featured one of the females with 10 ducklings in the park's northeast pond. Subsequently, I never managed to see more than 9 young Wood Ducks with this female.

On 26 June 1998 another female with 11 ducklings appeared at the same pond. On 16 July, only 8 eight young Wood Ducks remained with the first female and only 9 with the other female. By 19 July, the mother ducks no longer guarded their offspring and by early August some of the juveniles had moved from the small pond's security to Canyon Lake. On 30 August, only 3 of the surviving 17 young Wood Ducks remained at the small pond in the park while the others were at the lake. Then in late September or early October all of the Wood Ducks apparently migrated, for none were located on 20 October

During my 36 years of monitoring ducks at Canyon Lake and the park, the 1998 breeding season is the first in my awareness that Wood Ducks have bred in this vicinity. *L. M. Baylor, Rapid City, 57701.*

BOOK REVIEWS

BIRDS OF SOMALIA. J. S. Ash and J. E. Marshall. Yale University Press, New Haven. Hardbound. 336 pp. \$65.00.

BIRDS OF LIBERIA. Wulf Gatter. Yale University Press, New Haven. Hardbound. 320 pp. \$65.00.

These two texts are more like state bird books than country field guides. Basically they contain a series of range maps, with notes on habit, ecology and annual cycles for each species. Both books include short series of color plates, which, while well done, are not inclusive enough for either book to be considered a field guide. The Liberia book also contains a series of color photographs. Both guides have introductions to the ecology (both avian and physical) of the respective regions and ornithological histories of each nation. Both books list banding recoveries and include gazetteers to regional locations. The main focus of both books is the distribution of birds. Birders visiting either country will want one of these books and a field guide.

I visited Somalia over 30 years ago. At the time, the country was a birder's paradise. On every outing, I added ten to twenty birds to my ever-expanding lifelist. Often we encountered birds, such as the Fischer's Whyda, that were unmistakable but not supposed to be found in Somalia, according to Praed and Grant's *African Handbook of Birds*. *The Birds of Somalia* confirms the species to be common, especially in the south-central part of the country. Thus, because of their focus, both the Nigeria and Somali guides are essential for any birder visiting either nation.

Because I have never been to Nigeria, I looked the country up in Wheatley's *Where to Watch Birds in Africa*. Wheatley reports "Although Nigeria has one of the most diverse avifaunas in Africa and plenty of mammals, including gorillas, no one in their right mind would recommend birders to take a trip to this country, until violence and corruption are stamped out, and the infrastructure is greatly improved." The recent history of Somalia is painfully known to most Americans and Wheatley's assessment of political conditions there is similar to those for Nigeria. Thus, for the foreseeable future, ecotourists are unlikely visit either country; both books, however, would make interesting additions to public library or personal bird book collections. *Dan Tallman, Northern State University, Aberdeen SD 57401.*

WHERE TO WATCH BIRDS IN AUSTRALIA AND OCEANIA. Nigel Wheatley. 1998. Princeton University Press, Princeton. Hardbound. 448 pp. \$35.00.

This book is the third of a series by Wheatley on finding birds around the world. The previous volumes covered South America (reviewed SDBN 47:66-67) and Africa (SDBN 48:42). My first reaction to the book was to wonder how one volume could possibly do justice to so much territory. Certainly Australia (and perhaps New Zealand) warrants a book to itself. However, if the purpose of the book is not to be exhaustive, but simply an introduction to the region, the text becomes indispensable to the world traveler.

If for no other reason, the warnings on political situations are worth the book's purchase. You might note that I quoted the African guide in the previous review of the two African books. In the present book, we are warned of Papua
SOUTH DAKOTA BIRD NOTES 50(4): 92

DECEMBER 1998

New Guinea, which is "a very dangerous country to travel in....parts of Port Morsby, where violent crime is common place, look like war zones..." In Polynesia we are warned, "falling coconuts (don't camp under coconut trees) and eating poisonous fish are minor concerns compared with the potential effects of long-term nuclear testing..."

The book contains chapters on the various countries of the region. The chapters are broken into sections, including introduction, getting around, accommodations and food, health and safety, climate and timing, habitats, conservation, bird species, and endemics. The author provides an estimate of how many species are likely to be seen in each country. Individual islands and territories are then treated, with accounts of birds seen nowhere else and other rarities, including maps showing good birding areas. Local addresses for bird organizations and books and papers on each region are particularly valuable. Each chapter concludes with a list of expected species for the country

In summary, this text deserves essential suitcase space for any birder traveling to the Pacific Islands, New Zealand, or Australia. It will get you started in your quest for birds. Once in an exotic land, I have learned from experience that your best strategy is to call a local bird club (and this book will help you locate one) and hope that a resident birder will show you around (most will be delighted). My best birding day in Australia was when I bumped into a local birder and he proceeded to show me a myriad of species I would have otherwise missed in a city park. *Dan Tallman, Northern State University, Aberdeen SD 56401.*

The 1998 Summer Season
01 June 1998 to 31 July 1998

SEASONAL REPORTS

Compiled by: Jeffrey S. Palmer
College of Natural Sciences
Dakota State University
Madison, SD 57042

June was cool and wet. Average temperature statewide was about 5 degrees below normal and precipitation was approximately 40% above the average. State-wide temperature and precipitation for July were normal. Below, I have tried to highlight the more significant sightings: species which are out of range, dates which are earlier/later than listed in *The Birds of South Dakota*, and confirmed breeding records in counties other than those listed in *The South Dakota Breeding Bird Atlas* or previous (1995-97) Summer Season reports. Breeding confirmation was reported for 118 species (up considerably from the 1995-97 average of 91) including Tennessee Warbler, Virginia's Warbler, and Hooded Warbler (all of which would represent first confirmed breeding records for the state). Reports were received for 242 species (1995-97 average is 239) including **22 species of warblers!** Vagrant Blue-winged, Prothonotary, and Kentucky warblers were found at Newton Hills State Park in Lincoln County. In the Black Hills, a Blackburnian Warbler was found in Roby Canyon, Custer County and a Northern Parula was singing in Hot Brook Canyon, Fall River County. Additionally, there were numerous reports of late migrants including Chestnut-sided Warbler, Magnolia Warbler, Yellow-rumped Warbler, Black-and-white Warbler, Mourning Warbler, Wilson's Warbler, and Canada Warbler.

Common Loon All Reports: 16 Jun Meade and 19 Jun Butte LS; 23 Jun Sully RBA; 24 Jun Day DRS
Pied-billed Grebe Confirmed Breeding: 20 Jun Clay (PY) BH; Day (PY) DRS
Horned Grebe Only Report: 13 Jun Brown JCS
Red-necked Grebe Confirmed Breeding: 01 Jul Waubay NWR, Day County (PY) LH ... also reported 16 Jun McPherson JDW; 24 Jun Enemy Swim Lake, Day County (P) DRS
Eared Grebe All Reports: 19 Jun Butte LS; 22 Jun Day DRS; 28 Jun Harding RAS; 10 Jul Brown JCS; 29 Jul Meade VDF
Western Grebe Confirmed Breeding: 03 Jun Day (PY) JCS; 28 Jul Day (PY) LH ... also reported 12 Jun Meade EEM
Clark's Grebe Confirmed Breeding: 16 Jul Rush Lake, Day County (PY) DRS ... also reported 10 Jun Brown REP
American White Pelican Confirmed Breeding: 11 Jun Day (NY) LH ... also reported 05 Jul Marshall JPS, TH; 25 Jul Kingsbury JSP
Double-crested Cormorant Confirmed Breeding: 11 Jun Day (NY) LH ... also reported 13 Jun Custer CMW; 05 Jul Kingsbury BH; 05 Jul Marshall JPS, TH; 25 Jul Miner JSP
American Bittern All Reports: 06 Jun Faulk MMM; 16 Jun Meade LS; 02 Jul Day JCS; 06 Jul Minnehaha JPS
Least Bittern Only Report: 25 Jul Day LH
Great Blue Heron Confirmed Breeding: 12 Jun Marshall (ON) LH; Custer (NY) CMW
Great Egret Confirmed Breeding: 12 Jun Ft. Sisseton (NY) LH
Snowy Egret Only Report: 01 Jul Brown JCS
Little Blue Heron Only Report: 12 Jun Brown SLS
Cattle Egret Confirmed Breeding: Brown (ON 1000+) SLS ... also reported 10 Jun Hughes (3) JCS; 14 Jun Lincoln RFS
Black-crowned Night-Heron Confirmed Breeding: Brown (ON 750+) SLS
White-faced Ibis Confirmed Breeding: Brown (ON 100+) SLS
Snow Goose All Reports: 10 Jun Brown JCS; 17 Jun Day LH; 05 Jul Kingsbury BH; 25 Jul Kingsbury JSP
Canada Goose Confirmed Breeding: 15 Jun Minnehaha (PY) MKZ; 14 Jul Day (PY) LH; Day (PY) DRS; Meade (PY) EEM; Perkins (PY) DCG
Wood Duck Confirmed Breeding: 20 Jun Minnehaha (PY) MKZ; 28 Jun Harding (PY) RAS; 01 Jul Day (PY) LH; 15 Jul Lawrence (PY) VDF; 29 Jul Meade (PY) RAS
Green-winged Teal Only Report: 25 Jul Miner JSP
Mallard Confirmed Breeding: 15 Jul Lawrence (PY) VDF; 28 Jul Day (PY) LH; Day (PY) DRS
Northern Pintail Confirmed Breeding: 29 Jul Meade (PY) VDF ... also reported 29 Jul Lawrence RAS; Day DRS
Blue-winged Teal Confirmed Breeding: 25 Jul Miner (PY) JSP; 28 Jul Day (PY) LH; Day and Roberts (PY) DRS; Perkins (PY) DCG
Cinnamon Teal All Reports: 25 Jun Butte (2) RAS; 06 Jul Day (1 female) DRS
Northern Shoveler Confirmed Breeding: Day (PY) DRS ... also reported 29 Jul Meade RAS
Gadwall Confirmed Breeding: 11 Jul Day (PY) LH; 29 Jul Meade (PY) VDF
American Wigeon Confirmed Breeding: 29 Jul Meade (PY) RAS ... also reported 11 Jun Hand JCS; 14 Jun Meade JSP; 29 Jul Meade VDF
Canvasback Confirmed Breeding: 25 Jun Day (PY) LH ... also reported 06 Jun McPherson JDW; 04 Jul Hughes RBA; Day DRS
Redhead Confirmed Breeding: 04 Jul Hughes (PY) RBA ... also reported 05 Jul Marshall JPS, TH; 29 Jul Meade RAS, VDF; Day LH, DRS
Ring-necked Duck Confirmed Breeding: 03 Jun Brown (PY 3) JCS ... also reported 05 Jul Marshall JPS, TH
Lesser Scaup All Reports: 03 Jun Codington LH; Day DRS
Bufflehead Only Report: 22 Jun Roberts (1 female) DRS
Hooded Merganser All Reports: 22 Jun Bitter Lake, Day County DRS; 01 Jul Waubay NWR, Day County LH

Common Merganser All Reports: **05 Jun Day DRS**; 20 Jul Pennington MMM; 31 Jul Lawrence VDF

Ruddy Duck Confirmed Breeding: 28 Jul Brown (PY 6) DAT

Osprey Confirmed Breeding: Pennington (NY) TBW

Bald Eagle All Reports: 24 Jun Minnehaha MKZ; 18 Jul Bon Homme JSP, RFS

Sharp-shinned Hawk All Reports: 13 Jun Lawrence JSP; 26 Jul Lawrence VDF; Pennington TBW

Cooper's Hawk Confirmed Breeding: **02 Jul Shannon (NY 2) DB**

Northern Goshawk Only Report: 13 Jun Pennington JSP

Broad-winged Hawk Confirmed Breeding: 26 Jul Lawrence (FL 4) REP, VDF ... also reported 21 Jun – 18 Jul Lincoln (2) RFS; 28 Jun Lincoln (2) BH; 09 Jul Pennington JSP, RFS

Swainson's Hawk Confirmed Breeding: 03 Jul Meade (NY) EEM; Day (ON) DRS

Red-tailed Hawk Confirmed Breeding: 19 Jun Meade (NY 2-3) REP; Day (ON) DRS

Ferruginous Hawk Confirmed Breeding: 06 Jun Faulk (ON) MMM; Perkins (ON) DCG

Golden Eagle Confirmed Breeding: 03 Jul Meade (FL) EEM; Perkins (ON) DCG ... also reported 10 Jun Hughes JCS; 23 Jun Shannon DB

American Kestrel Confirmed Breeding: **07 Jul Day (FL) LH**

Merlin All Reports: 11 Jul Meade VDF, RAS; 22 Jul Meade REP

Gray Partridge Confirmed Breeding: 13 Jul Meade (PY) EEM; Perkins (PY) DCG ... also reported Custer and Moody JSP

Ring-necked Pheasant Confirmed Breeding: 08 Jun Brown (PY) JCS

Sharp-tailed Grouse Confirmed Breeding: 29 Jul Meade (PY) VDF ... also reported 07 Jul Marshall LH; 29 Jul Meade RAS; Meade EEM; Perkins DCG

Wild Turkey Confirmed Breeding: 11 Jun Custer (PY 3) JSP; 13 Jul Meade (PY) APB; Meade (PY) EEM

Virginia Rail Confirmed Breeding: **Perkins (PY) DCG** ... also reported 25 Jul Kingsbury JSP

Sora All Reports: 05 Jul Roberts JPS, TH; 08 Jul Custer RFS; 25 Jul Kingsbury JSP; Custer and Pennington MMM; Day LH

American Coot Confirmed Breeding: **25 Jul Miner (PY) JSP**; 28 Jul Day (PY) LH; 29 Jul Meade (FL) VDF; Day (FL) DRS

Semipalmated Plover All Reports: 25 Jul Miner JSP; 30 Jul Brown DAT

Killdeer Confirmed Breeding: 10 Jul Minnehaha (FL) MKZ; 22 Jul Day (PY) LH; 25 Jul Custer (FL) MMM

American Avocet All Reports: 28 Jun Meade EEM; 28 Jun Harding RAS; 06 Jul Brown DAT

Greater Yellowlegs All Reports: 06 Jul Brown DAT; 29 Jul Meade RAS

Lesser Yellowlegs All Reports: 05 Jul Kingsbury BH; 06 Jul Brown DAT; 18 Jul Turner RFS; 28 Jul Day LH; 29 Jul Meade RAS

Solitary Sandpiper All Reports: 15 Jul Butte RAS, VDF; 16 Jul Clay DS; 18 Jul Turner RFS; 25 Jul Kingsbury JSP; 28 Jul Brown DAT

Willet All Reports: 07 Jul Jackson RAP; Day and Roberts DRS

Spotted Sandpiper Confirmed Breeding: **20 Jun Lincoln (PY 2) BH**

Upland Sandpiper Confirmed Breeding: 15 Jul Butte (PY) RAS; Day and Roberts (ON) DRS

Hudsonian Godwit Only Report: **30 Jul Brown (3) DAT**

Marbled Godwit All Reports: 25 Jul Kingsbury JSP; 30 Jul Brown DAT; Day and Roberts DRS

Ruddy Turnstone Late: **08 Jun Day DRS**

Sanderling Only Report: 25 Jul Kingsbury JSP

Semipalmated Sandpiper Late: 05 June Brown DAT ... also reported **06 Jul Brown DAT**; 16 Jul Clay DS; 18 Jul Turner RFS; 25 Jul Miner JSP; 29 Jul Meade VDF

Least Sandpiper Late: 05 Jun Brown DAT ... also reported **05 Jul Kingsbury BH**; 16 Jul Clay DS; 18 Jul Bon Homme and Turner RFS; 28 Jul Brown DAT

White-rumped Sandpiper Late: 05 Jun Brown DAT ... also reported **10 Jul Brown JCS**

Baird's Sandpiper All Reports: 18 Jul Bon Homme and Turner RFS; 25 Jul Miner JSP; 28 Jul Brown DAT

Pectoral Sandpiper All Reports: 05 Jul Kingsbury BH; 18 Jul Bon Homme and Turner RFS; 25 Jul Miner JSP; 28 Jul Day LH; 30 Jul Brown DAT

Stilt Sandpiper All Reports: 16 Jul Clay DS; 18 Jul Bon Homme and Turner RFS; 25 Jul Miner JSP; 30 Jul Brown DAT

Long-billed Dowitcher All Reports: 29 Jul Meade RAS, VDF; 30 Jul Brown DAT

Franklin's Gull All Reports: 05 Jul Marshall JPS, TH; 25 Jul Miner JSP; 29 Jul Meade VDF, RFS; Day DRS, LH

Ring-billed Gull Confirmed Breeding: 12 Jun Day (NY) LH; Day (ON) DRS

California Gull All Reports: 16 Jun Meade LS; Day DRS

Common Tern All Reports: 31 Jul Day JCS; Day DRS, LH

Forster's Tern Confirmed Breeding: Day (ON) DRS ... also reported 02 Jun Hand MMM; 05 Jul Day JPS, TH; 25 Jul Miner JSP

Least Tern Only Report: 18 Jul Bon Homme RFS, JSP

Black Tern Confirmed Breeding: Day (ON) DRS

Mourning Dove Confirmed Breeding: 10 Jun Custer (NY 2) *fide* DS; 30 Jun Minnehaha (NB) MKZ; Day (ON) DRS

Black-billed Cuckoo Confirmed Breeding: 10 Jun Oahe Dam (CF) JCS; 25 Jul Pennington (CF) MMM ... also reported 28 Jun Lincoln RFS; Day DRS, LH; Perkins DCG

Yellow-billed Cuckoo Confirmed Breeding: 11 Jun Oahe Dam (CF) JCS ... also reported 18 Jun Stanley TBW; 17 Jul Day LH; Lincoln RFS

Eastern Screech-Owl Only Report: 31 Jul Brown JCS

Burrowing Owl Confirmed Breeding: 28 Jul Custer (FL) MMM; Meade (FL) EEM; Pennington (NY) RAP; Perkins (FL) DCG
