DIVERSITY IS GOOD

Some people have complained about seeing fewer bird sightings on the SDOU subscription list serve. eBird might be partly to blame for this but it does not have to be that way. It is very easy to copy the data you enter into eBird and paste into a posting on the website. I plead guilty myself for not posting often enough and will try to do better.

I recently saw this letter on the Iowa list serve and thought that it made a number of good points about technology in birding and appealing to a wider audience. I am quoting it here with the writer's permission.

Birders,

In regards to the discussion about all the different formats in which birds are being reported and the avenues in which birding information, questions, etc., are being discussed, I think what we are seeing is due to a new diversity in birding.

Birding, that is, looking at birds beyond a casual interest level, now includes people of various generations, races, and socioeconomic backgrounds more than it ever has. It's hard to argue that technology hasn't played somewhat of a role in this very beneficial expansion. From there, it's hard to argue that younger generations aren't the ones most being reached by the technological opportunities in the world of birding. With a greater diversity in birders, new avenues of information sharing are bound to arise and take off. As much as we'd like to have a one-size fits all way to report, share, and discuss, it's probably not going to happen. For one entity to appeal to the masses, it would be required to be extraordinarily dynamic. That would require that entity to have a dynamic and hungry core, full of a wide variety of individuals wanting to work hard at full inclusion and growth, with everyone on the same page. That sounds attractive, but it may not be feasible. This is by no means any commentary on the IOU, IA-Birds, any Audubon group or bird club in our state or anywhere else.

Diversity is a strength, and with it comes many other variables. If we connect with one another and become a cohesive ball of good for birds and their habitat, we will be a success.

As long as one of the top goals is to promote birding and bird habitat, we will succeed. If personal goals, pride, and egos are higher on and in the birding food chain, fragmentation will prevail. I, for one, think there is already plenty of fragmentation of the landscape in this state where we live. I hope to see Iowa birders "gel" to help one another; old helping young, young helping old, middle helping middle, etc., etc. If you haven't noticed, we have an enormous challenge for preserving and restoring habitat in our state, but it can happen. What is going to be our conservation success story, not yet written?

Bird on...

*Matthew T. Wetrich
Nikon Birding ProStaff & Iowa Naturalist*

Technology, especially eBird, appeals to young folks as do other new technologies. Most of the younger generation carry a smart phone with them at all times, so they have instant access to eBird for keeping their bird records, as well as being able to look up what birds others have seen in an area they are going to visit.

I have always been a tech person so I have used eBird for several years and appreciate not hand writing records anymore and knowing my data is always available on the Cornell database for my use and for researchers to use. Aside from eBird, I also like online bird field guides. For those of us who appreciate the natural world, guides to butterfly, dragonfly, reptile, and wild flower books, are now available on my phone.

Some people find shortcomings in eBird because they or someone they know has read a sighting that they do not think can be correct. We are very lucky to have three great eBird reviewers in South Dakota: Chris Anderson, Scott Stolz, and Richard Latuchie so I think erroneous sightings in SD are minimal.

Connecting via eBird is also a great way to stay in touch with other birders. A young man I coached in soccer twenty years ago returned to Yankton to visit his parents and I reconnected with him through eBird. Brian Adam found me on eBird by searching for Yankton area birders and we birded together. He joined SDOU, and participated in the SDOU 2015 Oacoma Spring Meeting.

Richard Latuchie has arranged for an eBird representative to speak at the Fall SDOU meeting in Vermillion (14-16 October 2016) to update us on the latest from eBird. Look for the registration form and be sure to attend to learn more about eBird, hear the other presentations, and bird with your friends.

Roger Dietrich

2015 REPORT OF THE RARE BIRD RECORDS COMMITTEE

David L. Swanson. Department of Biology. University of South Dakota. Vermillion 57069. Email: david.swanson@usd.edu.

The SDOU Rare Bird Records Committee (RBRC) met on 14 November 2015 at Brookings. There was no spring meeting as discussion and rating of reports for the Spring of 2015 took place electronically. The members of the committee were Todd Jensen, Ricky Olson, Jeffrey Palmer, David Swanson (secretary) and J. David Williams. All members attended both meetings or voted *in absentia*.

Springer (1988. *South Dakota Bird Notes* 40:67-70) outlined the purpose and voting procedures of the RBRC. The RBRC strongly encourages observers of rare or unusual birds in South Dakota to report their observations to the secretary of the RBRC (David Swanson of Vermillion, SD), preferably via email at david.swanson@usd.edu. A *Rare Bird Report Form* is available in electronic format for this purpose from David Swanson, or a form can be downloaded from <http://www.sdou.org/>, by clicking on the *Seasonal Reporting* link and then clicking on the link for the *Rare Bird Report Form*. A summary of the type of information desired by the RBRC in a rare bird report can be found in Swanson (2015. *South Dakota Bird Notes* 67:64-71). The directions and forms are also available on the SDOU.org website. Select RARE BIRDS under the BIRDS category.

The RBRC requests rare bird reports for species listed as hypothetical or accidental in the state, including species reported from a portion of the state or time of year where that species is listed as accidental. A listing of birds belonging to these categories in South Dakota is provided in the latest version of the checklist of South Dakota birds, accessible at <http://www.sdou.org/> by clicking on the *Seasonal Reporting* link and then clicking on the link for the *South Dakota State Checklist*). Information regarding species listed as accidental for only a portion of the state can be found in Tallman et al. (2002. *Birds of South Dakota*, 3rd edition, SDOU, Aberdeen, SD). The RBRC regularly adds or removes species from the review list, based on current data, and these changes to the review list are reported in the annual reports of the RBRC in *South Dakota Bird Notes*. In addition, reports are requested for observations listed in the “Species Requiring Acceptance by the Rare Bird Records Committee” section in the Seasonal Reports of *South Dakota Bird Notes*. Observers whose records are accepted (Classes 1 and 2) are encouraged to publish these records

in *South Dakota Bird Notes*, so details of the observation can be communicated to a wider audience.

Following are the results of the committee's action since the last report in the June 2014 issue of *South Dakota Bird Notes* (Swanson, 2015. *South Dakota Bird Notes* 67:60-62). The numbers included in parentheses along with some reports indicate the committee's vote. If no numbers are listed, the vote was unanimous (5-0) or 4-0 if a committee member submitted the report. The committee wishes to emphasize that a rating of Class 3 or 4 (non-accepted record) does not imply any personal criticism of the observer. Such a rating only means that the information provided in the report, in the opinion of the committee, did not conclusively eliminate other similar species.

CLASS 1 (Accepted - Specimen, photograph, or recording).

Neotropic Cormorant. 22-26 November 2014. One juvenile at Ft. Randall Dam, Charles Mix Co. Photographed. Ron Mabie & Kelly Preheim. Casual visitor. (4 Class 1P, 1 Class 2).

Neotropic Cormorant. 13 July 2015. One adult in alternate plumage at Oahe Dam, Stanley Co. Photographed. Doug Backlund. Casual visitor.

Yellow-billed Loon. 28-29 November 2014. One in basic plumage at Lake Henry, Bon Homme Co. Photographed. Nancy Drilling et al. 2nd state record.

Sabine's Gull. 4 October 2015. One adult in alternate plumage at Lake Andes NWR, Charles Mix Co. Kelly Preheim. Rare fall migrant.

American Golden-Plover. 20 March 2015. One adult in basic plumage at Weisensee WPA, Minnehaha Co. Photographed. Kelly Preheim. Earliest spring record for the state.

Whooping Crane. 6 September 2015. One adult in Jackson Co. Photographed. Will Inselman and Josh Leonard. Earliest fall record for the state.

White-winged Dove. 25 May 2015. One adult at Pickstown, Charles Mix Co. Photographed. Ron & Marietta Mabie. Rare migrant.

Cassin's Vireo. 23 August 2015. One in basic plumage near Oahe Dam, Stanley Co. Photographed. Doug Backlund & Scott Stolz. 1st state record.

Steller's Jay. 9 September 2014. One adult at Custer State Park, Custer Co. Photographed. Paul Roisen. 2nd state record.

Clark's Nutcracker. 25-28 November 2014. One at Yankton Co. Photographed. Don Marker. Accidental East River.

Common Raven. 24 November 2014. One in Sully Co. Photographed and video recording. Nathan Baker. Rare visitor.

Common Raven. 2 February 2015. One along Highway 34, Haakon Co. Photographed. Michael Melius. Rare visitor.

Tufted Titmouse. 15-16 October 2015. One in Sioux Falls, Minnehaha Co. Photographed. Gilbert Blankespoor. Accidental visitor.

Yellow-throated Warbler. 30 September 2015. One adult male at Farm Island, Hughes Co. Photographed and banded. Eileen Dowd-Stukel. Accidental migrant.

Townsend's Warbler. 19 May 2015. One adult female at Aberdeen, Brown Co. Photographed. Dan Streifel, Gary Olson, Kelly Preheim. 5th spring record.

Chipping Sparrow. 3 January 2015. One in basic plumage at Canton, Lincoln Co. Photographed. Joseph Coppock. Second January record for the state.

Northern Cardinal. 5 August 2014. Nest with two eggs and one dead nestling – eventually abandoned – at Rapid City, Pennington Co. Photographed. Jocie Baker and Karen Pettigrew. Accidental nesting West River.

Eastern Meadowlark. 23-26 April 2015. One in Roberts Co. Video and audio recordings. Cheryl Vellenga. Casual visitor away from Lacreek NWR.

CLASS 2 (Accepted – Satisfactory written description).

Long-tailed Duck. 13 December 2014. One immature/female in basic plumage, Angostura Reservoir, Fall River Co. Photographed. Jocelyn Baker. Accidental West River.

Sabine's Gull. 2 October 2014. Two in first-year plumage at Oglalla Dam, Oglalla Lakota Co. Peter Hill. Accidental West River.

Common Raven. 10 March 2015. One at Oahe Dam, Stanley Co. Ricky Olson. Rare visitor.

Black-billed Magpie. 25 October 2014. One at Sica Hollow State Park, Roberts Co. Mark Otnes. Casual Far East.

Black-billed Magpie. 6 March 2015. One at Roberts Co. Mark Otnes. Casual Far East.

Black-throated Gray Warbler. 1 May 2014. One adult male at White Clay Dam, Oglalla Lakota Co. Peter Hill. 7th state record.

Indigo Bunting. 8 April 2014. One adult male at Randall Valley, Gregory Co. Ron Mabie. Earliest spring record for the state.

Peregrine Falcon. 17 December 2013. One immature at Shadehill Reservoir, Perkins Co. Dan Svingen and Nancy Drilling. Accidental winter visitor.

McCown's Longspur. 12 April 2015. One male in alternate plumage, Dunn Road, Harding Co. Nancy Drilling and Charlie Miller. Rare migrant Far West.

CLASS 3 (Not accepted – Identification possibly correct but description not completely convincing).

No reports were rated as Class 3.

CLASS 4 (Not accepted – Identification probably or certainly incorrect).

No reports were rated as Class 4.

Citizen Science in the Yard, Part I

Through ever-continuing advances in electronic information gathering and broadcasting, birders have become a vital part of research, incorporating record keeping, quick reporting, and general sharing of avian behaviors and habits. This new knowledge is available now at once due to the Internet and lightning fast eMail service.

When birders see electronic accounts of avian migrations to which they contributed, there may be a sense of accomplishment as well as enjoyment. This citizen science is not restricted to field work. It can be a productive part of yard birding.

There are thousands of yard birders in South Dakota, many very good at

Baltimore Orioles Are Always a Welcome Yard Ornament
Photo: Mick Zerr

species identification, avian behaviors, and timing of migration. If they take part in citizen science programs, they become an integral part of bird science. In this segment of Yardstuff, we will look at some of these programs. Most are free, and are national or even involve international programs.

Perhaps the oldest birding citizen science in the United States is *the Audubon Christmas Bird Count* (CBC). (www.audubon.org/christmas-bird-count)

Beginning on Christmas Day 1900, ornithologist Frank M. Chapman, an early officer in the recently formed Audubon Society, proposed a new holiday tradition to replace the annual Christmas hunts that were common. This “Christmas Bird Census” would count birds during the holidays rather than hunt them. In that first year, there were 27 counts and 90 species counted. In

the 2015 CBC, there were 2406 counts completed and 2106 species world-wide counted.

The data collected by observers over the past century allow Audubon researchers, conservation biologists, wildlife agencies and other interested individuals to study the health and status of bird populations across North America. The long term movements and populations of a given species due to factors such as human encroachment, environmental and climatological changes and chemical use can often be correlated with information from citizen science programs (Sullivan, et al 2014; Hurlbert and Liang 2012).

*Napping Common Redpoll During the Ir-
ruption of 2013* Photo: Mick Zerr

An important part of Christmas Bird Counts is the feeder watchers program. In the great redpoll irruption of 2012-13, thousands

of Common and several Hoary redpolls were reported in South Dakota, most of these sightings at feeders. This irruption started around the time of the CBC. At my neighborhood feeder complex in Sioux Falls, there were days with a hundred redpolls feeding at the same time. This irruption was not limited to redpolls, as there were as many Pine Siskins present. If citizen science were not available, this valuable information might have been lost to ornithological researchers.

The South Dakota *Seasonal Reporting* citizen science program allows reporting sightings to the state data base. Here, besides reporting your sight

eBird Yard Listing

ings, you can access information about what has been seen in the past, by whom, by county, by species and by date. To access this program, go to the *Seasonal Reporting* page on the SDOU website (sdou.org).

Another citizen science program yard birders can take part in is administered by the National Wildlife Federation. (nwf.org) In this program, called the *Certified Wildlife Habitat Program*, yard folks are taught how to create a positive habitat for birds.

The most popular and in-depth citizen science program for yard birders is *eBird* (ebird.org). With this program, yard owners can record the birds they see, keep track of bird lists, explore dynamic maps and graphs, share sightings and join the eBird community to contribute to field ornithology science and conservation efforts.

eBird's main goal is to maximize the utility and accessibility of the vast number of bird observations made each year by recreational and professional bird watchers. It is amassing one of the largest and fastest growing biodiversity data resources in existence. For example, in May 2015, participants reported more than 9.5 million bird observations across the world!

A yard birder simply enters when, where, and how they observed birds, then fills out a checklist of all the birds seen and heard during the time period. Providing various options for data gathering is another goal, as eBird includes point counts, transects, and area searches, as well as yard observations. Automated data quality filters developed by regional bird experts review all submissions before they enter the database. Local experts review unusual records that are flagged by the filters.

Other yard birding programs include *Project Feeder Watch* and the *Great Backyard Bird Count*. The GBBC is a joint program with Cornell University and Audubon. PFW is a joint program with Cornell and Bird Studies Canada. PFW covers much more time and requires a minimal cost to the observer. These programs can be utilized through the websites of the Cornell Lab or Audubon Society.

A CHANGING HABITAT

KELLY PREHEIM

Lake Andes National Wildlife Refuge

The Lake Andes National Wildlife Refuge (LANWR) is located in Charles Mix County, providing a valuable habitat for birds and other wildlife. This refuge is special to me because it is where I first became interested in birding while attending the first *South Dakota Birding Festival at Ft. Randall* six years ago. LANWR continues to be a favorite area for me to continue my study of birds. I have found that having a bird “patch” to frequent is a great way to learn about birds in my area.

During the Snowy Owl irruption of 2012 this area was inundated with Snowys and there were days when you could view over twenty of these beautiful white owls from the north in a few hours. Johnson’s Bay was also a popular area with many shorebirds, waterfowl and other marsh birds, but since the drought these past two years it has dried up and has been taken over by small trees and tall weeds.

The north unit of the refuge had a fish kill in the winter of 2013-2014 which resulted in thousands of dead fish frozen on the surface of the ice. This frozen banquet attracted upwards of 400-500 Bald Eagles to the area to eat the “fishcicles”. It was quite an amazing sight to see the surface of the ice dotted with Bald Eagles feeding on the fish kill. The trees and shoreline were also lined with Bald Eagles and later hundreds of gulls also stopped in to enjoy the feast.

LANWR has a nice variety of birds that either migrate through or are resident in the area. Highlights include Whooping Crane, Sandhill Crane, Greater Prairie-Chicken, Sharp-tailed Grouse, Northern Bobwhite, Tundra Swan, Golden Eagle, Piping Plover and many more. At times there are huge flocks of Western Meadowlark, Bobolink and different species of sparrows. Recently I photographed a Sage Thrasher there (rare for that area). This year I have seen quite a few Lark Buntings. Waterfowl migration at the refuge is generally remarkable for the number of different species present. The lake and surrounding areas inundated with ducks and geese is really quite a spectacle.

Ibis Feeding at LANWR August 29, 2016

Photo: Kelly Preheim

A large portion of the north unit of the LANWR dried up in 2015, but the spring of 2016 brought rain, filling up the north dike area and surprising me with a dramatic change. A great diversity of birds occupied this area and bird numbers for spring 2016 were greater than I’d ever seen there before. A rookery was formed in the reeds with multiple Black-crowned Night Herons, Great Egrets, and White-faced Ibis nesting. Cattle Egrets would fly back and forth over the cattails. I had previously seen rookeries only in dead trees, but this is the first time I’d seen a rookery in the cattails. I noticed that nearby Red Lake also had a rookery in the cattails.

During the last week of August I counted over 120 White-faced Ibis feeding in a marshy

*Western Grebe with young ready to be weaned.
(It looks as if junior is protesting that thought.)*

Photo: Kelly Preheim

area and nearly 40 Cattle Egrets in one tree all within the same square mile as the rookery. American White Pelicans were also coming through with a count of 200 that week. Great numbers of Eared Grebes and Western Grebes, many carrying young on their backs, were present. Hundreds of Ruddy Ducks and other duck species were there all summer. There were also very large flocks of Franklin's Gulls and a nice variety of shorebirds in the area. One day I observed a Caspian Tern fly by. Black Terns and Forster's Terns were present as well.

LANWR biologist Mick Hanan explained, "When the water recedes, the nutrients that are in the lake recycle into the soil and the sediment has a chance to consolidate again. When water is added back to the lake bed, submerged aquatic vegetation is able to grow because sunlight is able to penetrate through the water due to an increase in clarity. The presence of emergent and submerged aquatic vegetation recycles nutrients to maintain clarity in the water. It is kind of like hitting the reset switch on a wetland because it wipes the slate clean, including the absence of carp and other fish that stir up sediments and destroy the vegetation. This allows the wetland [or lake in this case] to go back through the stages of a wetland cycle. Lake Andes is really a big pond that is no different than many of the other ponds in the Prairie Pothole Region; it needs to go dry every now and then to go through all the proper cycles. The birds respond greatly to this new colonization of vegetation because with it brings a new colonization of insects, frogs and snakes that provide a great food source. Not to mention that the vegetation itself provides shelter for nesting and roosting."

My days of birding at the Lake Andes National Wildlife Refuge have provided me impressive information about birds and their behaviors. I recommend that all people serious about birds find a good birding area nearby and visit it — often. It is really quite interesting to watch a habitat changing in a matter of years and how that affects birds. It is also interesting to notice which birds visit an area and at what times of the year certain birds show up. Comparing these seasonal statistics to previous years gives some insight on the trends and habits of birds. Find a birding patch near you and see what you discover!

Common Mergansers at Lake Andes National Wildlife Refuge

Photo: Kelly Preheim

BIRDING THE PARKS OF SIOUX FALLS, SOUTH DAKOTA

by Todd Jensen

Siooux Falls is the largest city within the state of South Dakota and boasts an extensive park system, which includes the greenway along parts of Skunk Creek and the Big Sioux River. With the numerous parks within and along the edge of the city, the habitat is varied and provides opportunities to see many species of birds, especially in migration. Habitats include grasslands, riparian forests, upland forest, urban, waterways and wetlands. This all lies within a short distance, giving birders in the Sioux Falls area one of the better areas within South Dakota to bird without having to travel. Spring migrations at times has produced warbler fallouts with birders getting over twenty species in a day without ever having to travel outside the city limits. Not many places within South Dakota can claim that many species without having to travel some distance.

A select number of parks within Sioux Falls will be discussed here, including their location, habitat to a degree, trails and bird species. For a complete list of all the city parks, go to the city of Sioux Falls website. Parks being discussed here include Arrowhead Park/ Perry Nature Reserve/Mary Jo Wegner Arboretum, Elmwood Park, Great Bear Recreation Area, The Outdoor Campus (Sertoma Park), Sherman Park, and the Greenway along the Big Sioux River and Skunk Creek.

Arrowhead Park, just east of Sioux Falls, lies alongside the Arrowhead Expressway across from the Perry Nature Area, the Mary Jo Wegner Arboretum and historic East Sioux Falls. The park has maps of the trails available. The area consists of restored grasslands, some woodland and old quarries that have filled with water. Trails go along the quarried ponds as well as the grasslands and forest area on the east side of the park. The farther one away from the parking lot is better for water-

Perry Nature Reserve Photo: Mick Zerr

fowl. In winter time they can be productive with more than just Canada Goose and Mallard. Check the flocks for Cackling, Ross's and Snow goose. Other waterfowl observed have included Pintail, scaup, Green-winged Teal, and Common Goldeneye. Grassland and weedy area species include American Tree Sparrow, Dark-eyed Junco, and Field Sparrow, Downy and Hairy Woodpecker, Northern Flicker, Cedar Waxwing, Black-capped Chickadee and White-breasted Nuthatch have also been observed. Looking towards the Big Sioux River to the east you also might see raptors such as Bald Eagle and Red-tailed Hawk soaring.

The **Wegner Arboretum** area is new and being developed. Follow the road to the left (west of the arboretum buildings). Bird the woodlands along here, but note do not trespass on the private property nearby. Species observed here have included Yellow-bellied Sapsucker, and Red-bellied, Downy and Hairy woodpeckers. In migration, Yellow, Yellow-rumped, Orange-crowned, Magnolia, Blackburnian warblers, American Redstart and Ovenbirds, vireos, empidonax flycatchers, White-throated Sparrow, Spotted Towhee and several species of thrushes have been seen here.

Yellow-throated Vireo Photo: Terry Sohl

Great Bear Recreational Park, another park alongside the east-

ern edge of the city, is another very good park to bird. It is 220 acres and has four miles of trails. However, in the winter time it is a winter recreational park so birding is easier in spring, summer and fall. Note there is an archery area on the northeast side which is off limits for the summer. The habitat is, in large part, Burr Oak forest with upland prairie on top of the hills, giving it a mosaic of eastern deciduous forest meeting grassland steppe.

Upon entering, drive to the parking lot by the chalet. At the chalet, Eastern Bluebird are often around the buildings, as well as Barn Swallow and of course, the ubiquitous House Sparrow. A paved trail starts at the chalet and goes along the left side of the pond and splits into a “Y”. There are signs with maps on them posted along the hiking trails. The paved trail is level and handicapped accessible.

Migration and summer birding in this park is different compared to the Greenway, in numbers and species at times, but is still rewarding and has produced rarities not reported as occurring on the Greenway. Along the trail by the pond and creek flowing into it, one might see Wood Duck, Green Heron, Spotted Sandpiper, Belted Kingfisher and in migration Northern Waterthrush. During migration, along the trails can be seen Broad-winged Hawk, Ruby-throated Hummingbird, flycatchers (Least, Willow, Alder, Yellow-bellied), Blue-headed, Warbling, Red-eyed, Philadelphia, Yellow-throated and occasionally Bell’s vireos, plus several thrushes (Wood, Gray-cheeked, Hermit’s, Swainson’s and Veery). Numerous warblers such as Ovenbird, Golden-winged, Tennessee, Nashville, Mourning, Northern Parula, Blackburnian, Black-throated Blue and Wilson’s are often observed. Sparrows seen in good numbers include Lincoln’s, White-throated, Harris’s, White-crowned, American Tree Sparrows and Dark-eyed Junco observed. Meanwhile summertime breeders such as Eastern Wood-Pewee, Yellow-bellied Sapsucker, Scarlet Tanager, Great-crested Flycatcher, Indigo Bunting, Blue-gray Gnatcatcher, Eastern Bluebird, Rose-breasted Grosbeak and Yellow Warbler have been seen here. While birding along trails keep a lookout for Pileated Woodpecker, one of the rarities occasionally seen in the park.

Purple Finch

Photo: Terry Sohl

The final birding area discussed here consists of a series of greenway parks running along the Big Sioux River, which nearly encircles the city. These parks consist of riparian forest, manicured lawns and shrub areas. **Elmwood Park** is in northwest Sioux Falls at the southwest corner of Kiwanis Avenue and Russell Street. The northwestern area of the park is good habitat for birds. Dikes on the Big Sioux River border the park on the west side and remnants of a former oxbow lie within with what little riparian forest is there. Birding here in spring and fall, and occasionally summer, is most productive. Note that there are fallen branches, trees, woody vegetation and of course trash in the woodlot, so one needs to be alert. Walk over the bridge to where there are open areas that make it fairly easy to bird. Elmwood is noted for the possibility of being a little migrant trap, especially if there is a fallout in spring.

Species seen include thrushes, flycatchers and vireos. But what resident birders look for most at Elmwood is a warbler fallout. If conditions are right, trees can almost be dripping with warblers and vireos. Species numbers have been close to twenty within the park itself, including Yellow, Orange-crowned, Magnolia, Blackburnian, Bay-breasted, Black-throated Green, Mourning, Connecticut, Black-and-white, and Blackpoll warblers with Northern Waterthrush, Common Yellowthroat and American Redstart also present. Going west from the trees area, walk the dike. The top of the dike is paved which is part of the bike path and Greenway that circles the city. Look down on the channelized Big Sioux. Most of the water now gets diverted down the diversion channel. Waterfowl, herons, coots, shorebirds and even Belted Kingfisher can be seen. The diversion canal has an outflow from a quarry that runs open all winter, offering habitat for waterfowl.

Sherman Park contains an oxbow lake on the right (as you drive West Indian Mound Drive) and a hillside with woods on the left. Also note to the west side of the oxbow is the Great Plains Zoo. Best birding is near the parking area. Spring and fall migration is fairly good here and Broad-winged Hawks have been seen as well as thrushes, vireos, flycatchers, warblers (Bay-breasted has been regular), orioles and sparrows. The oxbow has breeding mallards and wood ducks. Occasionally Great Blue and Green herons show up. Summer has resident Blue-gray Gnatcatchers and Wood Thrush. In 2012, a White-eyed Vireo stayed late spring into early summer. **Sertoma Park/Outdoor Campus (East)** is in the Southwest part of the

city. Sertoma Park includes within its boundaries the Outdoor Campus East, the Sertoma Butterfly house and Marine Cove. The park features riparian forests and some restored grasslands, mostly Big Bluestem behind the visitor center as well as east of the oxbow and forest. In addition there is the Oxbow itself with some wetland vegetation and a fishing pond, giving the park much more diversity. Over two hundred species have been seen here, including some rarities. The east boundary of the park is along the Big Sioux River dike with a bicycle trail on top.

All seasons provide decent birding in the park. There are feeders which can provide views from inside of the visitor center or from the trail. Birds to watch for include most species of woodpecker, Black-capped Chickadee, both nuthatches, Northern Cardinal, at least six species of sparrow, American Goldfinch, House and Purple finches, Pine Siskin, and the occasional Ring-necked Pheasant.

The time to walk the entire trail system is very worthwhile. But, with just a short amount of time, walk the inside loop and bird from the bridge over the oxbow. At the fishing pond watch for Spotted Sandpiper and Tree, Barn and Northern Rough-winged swallows during migration. Also look for Pied-billed and Horned grebes. Species that can be seen in the oxbow include Blue-winged Teal, Wood Ducks, Canada Goose, Lesser and Greater yellowlegs, Solitary and Spotted sandpipers, Killdeer, Great Blue and Green herons. Check for Common Yellowthroat and Belted Kingfisher as well. In migration, Marsh Wrens and Swamp Sparrows on occasion show up. A Yellow-crowned Night-Heron was found here during the 2010 SDOU Spring Meeting.

Grassland and woodland species that may be seen, depending on the season, include Red-bellied and Red-headed woodpeckers, Golden-crowned and Ruby-crowned kinglets and American Tree, Fox (rare), Lark and Savannah sparrows. Thrushes seen include Gray-cheeked, Hermit, Swainson's and Veery. Blue-headed, Red-eyed, Warbling and Philadelphia vireos are found in the woodland areas. Flycatchers observed include Least, Willow, Alder, Olive-sided, and Great-crested. Eastern Phoebe, orioles, and buntings are also to be found. Well over twenty species of warblers have been seen here including Blue-winged, Golden-winged, Magnolia, Nashville, Yellow, Black-throated Green, Black-throated Blue, Northern Waterthrush, Blackburnian, Black-and-white and Blackpoll. Raptors seen here include Red-tailed and Cooper's hawks.

The final birding areas are a series of **Greenways Parks** that run along the Big Sioux River, most with manicured lawns and some riparian forest. There is a bicycle path which goes through these parks, encircling the city. One can bird on it and connect with other parks and greenways. The river may also be kayaked or canoed when water levels are adequate. In season, expect to find similar birds as in other woodland parks such as the vireos, flycatchers, warblers, shorebirds, waders and waterfowl.

If a birder spent an entire weekend at the parks mentioned, Sioux Falls would still have more parks in which to bird and explore. Whether a birder has just a few hours or the entire day, Sioux Falls Parks are always both birdy and near any services needed: food, gas, or a place to stay or a brief respite to clear up your thoughts. Best of all, it doesn't cost anything, There are no entrance fees.

For driving directions to these parks, and access to maps, go to <www.siouxfalls.org/contactus/parks/public-parks>

Great Bear Recreation Area

SEASONAL REPORTS

JEFFREY S. PALMER

The 2016 Spring Season

Compiled By: Jeffrey S. Palmer

01 March 2016 to 31 May 2016

College of Arts & Sciences
Dakota State University
Madison, SD 57042

There were 315 species, including 8 rarities, reported during the season. The ten-year (2006-2015) average is 323. Below, I have tried to highlight the more significant sightings (dates that are among the earliest/latest included in the online database and species that are out of range). For early/late migration dates, I have listed the three earliest/latest dates (by county); however, if these did not include a sighting East River, West River, and along the Missouri River, I have given the earliest/latest reported date in the missing region also. Finally, included at the end is a list of species (26) that were not reported this year and might be expected during the Spring Season. A species is placed on the list if it was not reported this year but had been reported during spring in at least 2 of the previous 5 years. Numbers in parentheses indicates the number of consecutive years (up to 4) that the species has appeared on the list during the season. Not reported during the Spring Season for the last 5 years, **Yellow-crowned Night-Heron** was removed from this list.

Greater White-fronted Goose Early: 01 Mar Brown GO; 01 Mar Edmunds BP; 01 Mar Lake JSP; 03 Mar Charles Mix RM; 03 Mar Stanley RDO; 04 Mar Bennett SS ... Late: 30 Apr Brown BP; 16 Apr Minnehaha JC, CA; 13 Apr Day BP; 09 Apr Charles Mix KP

Snow Goose Early: 01 Mar Charles Mix KP, RM; 01 Mar Clay GJS; 01 Mar Douglas KP; 01 Mar Edmunds BP; 01 Mar Gregory RM; 01 Mar Stanley RDO; 04 Mar Bennett SS

Ross's Goose Early: 01 Mar Charles Mix KP; 01 Mar Gregory RM; 04 Mar Clay DS; 04 Mar Douglas KP ... Late: **21 May Miner JSP**; 16 Apr Lake JSP; 15 Apr Day BP; 20 Mar Walworth and Potter RDO

Cackling Goose Late: 17 Apr Bennett RSL; 08 Apr Stanley RDO; 27 Mar Faulk SS, BP

Trumpeter Swan reported 25 Mar McCook SS; 28 Mar Yankton GJS; 05 Apr Potter SS

Tundra Swan Early: 14 Mar Marshall GO; 20 Mar Potter RDO; 22 Mar Brown GO ... Late: **21 Apr Roberts CV**; 11 Apr Brown GO; 27 Mar Faulk SS, BP

Wood Duck Early: 01 Mar Brown GO; 12 Mar Kingsbury JSP; 19 Mar Lake JSP; 27 Mar Charles Mix ND; 02 Apr Bennett CA, JC, ND

Gadwall Early: 01 Mar Charles Mix KP; 02 Mar Brown BP; 04 Mar Yankton RND; 07 Mar Oglala Lakota SS

American Wigeon Early: 03 Mar Charles Mix RM; 04 Mar Jackson SS; 04 Mar Yankton RND; 05 Mar Lake JSP

Blue-winged Teal Early: 03 Mar Charles Mix and Gregory RM; 17 Mar Clay DS; 25 Mar Davison ND; 25 Mar McCook SS; 02 Apr Bennett CA, JC, ND; 02 Apr Meade JLB; 02 Apr Oglala Lakota CA, JC

Cinnamon Teal All Reports: **22 Mar Hanson BP**; 31 Mar Charles Mix RM; 02 Mar Oglala Lakota ND; 07 Apr Hand BP; 20 Apr Codington BP

Northern Shoveler Early: 03 Mar Charles Mix RM; 06 Mar Bon Homme RND; 06 Mar Brown BP; 20 Mar Meade JLB

Northern Pintail Early: 01 Mar Charles Mix KP; 01 Mar Stanley RDO; 04 Mar Bennett and Jackson SS; 04 Mar Yankton RND; 05 Mar Faulk BP; 05 Mar Lake JSP; 05 Mar Minnehaha CA

Green-winged Teal Early: 01 Mar Charles Mix KP; 01 Mar Stanley RDO; 03 Mar Gregory RM; 04 Mar Bennett and Jackson SS; 06 Mar Brown BP

Canvasback Early: 01 Mar Charles Mix KP; 04 Mar Jackson SS; 04 Mar Yankton RND; 05 Mar Lake JSP

Redhead Early: 01 Mar Charles Mix KP; 01 Mar Lake JSP; 01 Mar Stanley RDO; 04 Mar Jackson SS

Ring-necked Duck Early: 03 Mar Charles Mix RM; 04 Mar Jackson SS; 04 Mar Lyman JC; 04 Mar Yankton RND; 05 Mar Lake JSP

Greater Scaup Early: 12 Mar Brown BP; 20 Mar Walworth RDO; 22 Mar Hanson BP; 22 Mar Moody SS ... Late: 26 Apr Minnehaha JC; 08 Apr Turner CA; 05 Apr Spink BP; 02 Apr Clay DS

Lesser Scaup Early: 01 Mar Charles Mix KP; 04 Mar Yankton RND; 05 Mar Lake JSP; 07 Mar Oglala Lakota SS

Long-tailed Duck Only Report: 03 Mar Charles Mix RM

Bufflehead Early: 01 Mar Charles Mix KP; 01 Mar Lake JSP; 03 Mar Gregory RM; 07 Mar Oglala Lakota SS ... Late: 13 May Hughes DB; 09 May Brown BP; 02 May Walworth BP; 30 Apr Pennington JLB

Common Goldeneye Late: 13 Apr Day GO; 09 Apr Marshall CV; 06 Apr Roberts BP; 02 Apr Meade JLB; 02 Apr Charles Mix KP; 02 Apr Bennett JC, CA

Hooded Merganser Early: 01 Mar Lake JSP; 04 Mar Hughes RDO; 07 Mar Brown GO; 16 Mar Custer MMM ... Late: 31 May Charles Mix KP; 01 May Pennington JLB; 30 Apr Lake JSP

Common Merganser Late: 30 May Pennington CLG; 12 May Buffalo SS, RDO; 07 May Yankton RND; 29 Apr Roberts CV

Red-breasted Merganser Early: 04 Mar Hughes RDO; 07 Mar Lake JSP; 12 Mar Kingsbury JSP ... Late: 28 May Brown BP; 14 May Stanley DB; 13 May Hughes DB

Ruddy Duck Early: 01 Mar Lake JSP; 03 Mar Charles Mix RM; 04 Mar Yankton RND; 02 Apr Bennett CA, JC

Ruffed Grouse All Reports: 03 Mar Lawrence DGP; 21 Mar Lawrence DGP; 12 Apr Meade SW; 13 Apr Lawrence DGP; 21 Apr Lawrence ND; 23 Apr Lawrence JLB

Greater Sage-Grouse All Reports: 06 Mar Harding CEM; 12 Mar Harding JLB, RDO; 09 Apr Butte JLB, RSL; 08 May Harding KM

Northern Bobwhite All Reports: 22 Apr Charles Mix KP; 24 May Charles Mix KP

Common Loon Early: 19 Mar Gregory RM; 26 Mar Lake JSP; 29 Mar Hughes KM ... Late: 25 May Gregory RM; 14 May Stanley DB; 14 May Lyman RSL, KP; 21 Apr Day BP

Pied-billed Grebe Early: 07 Mar Lake JSP; 23 Mar Brown BP; 24 Mar Stanley ND; 02 Apr Meade JLB

Horned Grebe Early: 20 Mar Charles Mix KP; 26 Mar Lake JSP; 01 Apr Brown GO; 02 Apr Bennett CA, JC ... Late: 17 May Charles Mix KP; 08 May Douglas KP; 01 May Yankton GJS; 01 May Walworth RDO; 30 Apr Pennington JLB

Red-necked Grebe Only Report: 17 Apr Marshall GO

Eared Grebe Early: 06 Apr Spink BP; 09 Apr Butte EK, RSL; 14 Apr Faulk SS; 16 Apr Sully KM

Western Grebe Early: 13 Apr Day BP; 14 Apr Sully SS; 15 Apr Stanley KM; 24 Apr Pennington JLB

Clark's Grebe All Reports: 27 Apr Hughes RDO; 29 Apr Hughes DB; 10 May Pennington JLB; 13 May Brule RND; 28 May Brown BP

American White Pelican Early: **03 Mar Meade EEM**; 12 Mar Kingsbury JSP; 13 Mar Charles Mix KP; 24 Mar Aurora ND; 02 Apr Bennett CA, JC, ND

Double-crested Cormorant Early: 23 Mar Day BP; 24 Mar Haakon ND; 24 Mar Lake SS; 26 Mar Buffalo SS

American Bittern Early: 23 Apr Bennett RDO; 08 May Lincoln CA; 11 May Walworth RDO

Great Blue Heron Early: 07 Mar Pennington CLG; 22 Mar Stanley RDO; 24 Mar Custer JLB; 25 Mar Davison ND; 25 Mar Marshall MO; 25 Mar McCook SS; 25 Mar Minnehaha SS

Great Egret Early: 05 Apr Day GO; 11 Apr Brown GO; 16 Apr Minnehaha CA, JC; 18 Apr Corson ND

Snowy Egret Early: 26 Apr Edmunds BP; 30 Apr Brookings CV; 30 Apr Charles Mix KP, RM; 30 Apr Gregory CA, JC, KP; 30 Apr Miner JSP

Cattle Egret Early: 26 Apr Edmunds BP; 26 Apr Minnehaha JC; 28 Apr Clay DS

Green Heron Early: 13 May Clay DS; 17 May Minnehaha CA; 18 May Lake JSP

Black-crowned Night-Heron Early: 23 Apr Butte EK; 28 Apr Yankton RND; 02 May Brown, Edmunds, and Walworth BP

Glossy Ibis All Reports: 11 May Potter RDO; 12 May Brown and Marshall GO; 13 May Brown MO

White-faced Ibis Early: **08 Apr Day BP**; 21 Apr Brown GO; 23 Apr Bennett RDO; 29 Apr Clay DS

Turkey Vulture Early: 22 Mar Clay DS; 24 Mar Moody SS; 25 Mar Charles Mix RM; 28 Mar Custer MMM

Osprey Early: **27 Mar Pennington RSL**; 01 Apr Lawrence DGP; 03 Apr Custer ND; 13 Apr Marshall GO; 25 Apr Hughes DB

Northern Harrier Early: 01 Mar Brown and McPherson BP; 03 Mar Campbell SS; 04 Mar Bennett SS

Sharp-shinned Hawk Late: 25 May Pennington OCW; 17 May Lawrence RDO; 11 May Union DS; 30 Apr Brown BP

Cooper's Hawk Confirmed Breeding: 04 Apr Brown (NB) GO

Northern Goshawk All Reports: 01 Mar Edmunds BP; 01 Apr Charles Mix RM; 04 Apr Marshall BP

Broad-winged Hawk Early: **03 Apr Union GJS**; 16 Apr Brookings CV; 16 Apr Brown BP; 29 Apr Lawrence DGP ... Late: 28 May Marshall GO, BP; 24 May Roberts MO; 22 May Lawrence RSL; 19 May Stanley KM

Swainson's Hawk Early: 13 Apr Day BP; 13 Apr Pennington OCW; 14 Apr Hyde SS

Rough-legged Hawk Late: **08 May Pennington JLB**; 18 Apr Meade ND; 17 Apr Bennett RSL; 03 Apr Charles Mix KP; 01 Apr Brown GO

Ferruginous Hawk Early: 08 Mar Custer MMM; 09 Mar Harding ND; 12 Mar Butte JLB, ND; 06 Apr Hyde BP

Golden Eagle Late: 28 May Hughes KM; 06 Mar Stanley JC

Virginia Rail Early: 01 May Hutchinson CA, JC; 07 May Harding KM; 08 May Lincoln CA; 16 May Stanley RDO

Sora Early: Early: 30 Apr Pennington JLB; 01 May Clay GJS; 03 May Charles Mix RM; 12 May Brown GO; 12 May Hutchinson KP; 12 May Minnehaha CA

American Coot Early: 01 Mar Stanley RDO; 06 Mar Charles Mix KP; 06 Mar Yankton RND; 07 Mar Brown GO; 07 Mar Lake JSP; 07 Mar Pennington CLG

Sandhill Crane Early: 07 Mar Douglas KP; 20 Mar Beadle SS; 21 Mar Charles Mix KP, RM; 21 Mar Gregory RM; 21 Mar McPherson GO; 28 Mar Custer MMM ... Late: 01 May Walworth RDO, KM; 20 Apr Brown BP; 10 Apr Douglas KP; 09 Apr Meade JLB; 09 Apr Butte JLB

Black-bellied Plover Early: 01 May Potter KM, RDO; 14 May Aurora RND; 14 May Hughes KP, RSL, SS ... Late: 18 May Potter and Hughes RDO; 15 May Hyde SS, RND, RDO; 15 May Aurora RDO, KP, CV

American Golden-Plover Early: 25 Apr Yankton RND; 26 Apr Brown GO; 27 Apr Marshall GO ... Late: 28 May Brown BP; 24 May Marshall GO; 21 May Miner JSP; 18 May Hughes RDO

Semipalmated Plover Early: 16 Apr Aurora RDO; 17 Apr Brown BP; 26 Apr Faulk BP; 01 May Potter KM, RDO ... Late: 27 May Codrington BP; 21 May Miner JSP; 21 May Douglas SS, KP; 21 May Charles Mix RM

Piping Plover Early: **13 Apr Hughes DB**; 17 Apr Brown BP; 20 Apr Stanley SS

Killdeer Early: 06 Mar Bon Homme and Yankton RND; 06 Mar Charles Mix KP; 06 Mar Clay DS; 06 Mar Custer MMM; 07 Mar Douglas KP; 07 Mar Lake JSP

Black-necked Stilt Early: **16 Apr Minnehaha CA, JC**; 21 Apr Day BP; 09 May Brown BP; 14 May Hyde CV et al ... Late: 28 May Brown BP; 20 May Aurora SS; 15 May Hyde RDO

American Avocet Early: 05 Apr Hughes RDO; 09 Apr Charles Mix KP; 10 Apr Brule RDO; 13 Apr Day BP; 13 Apr Marshall GO; 23 Apr Bennett RDO

Spotted Sandpiper Early: 16 Apr Minnehaha CA, JC; 24 Apr Stanley KM; 25 Apr Yankton RND; 05 May Pennington ND

Solitary Sandpiper Early: 27 Apr Marshall GO; 30 Apr Aurora CA, JC, KP; 30 Apr Brown BP; 30 Apr Douglas CA, JC, KP; 30 Apr Kingsbury CV; 01 May Sully KM, RDO; 02 May Pennington CLG ... Late: 30 May Charles Mix RM; 28 May Pennington RSL; 21 May Miner JSP

Greater Yellowlegs Early: **12 Mar Brown BP; 12 Mar Clay DS; 12 Mar Minnehaha JC**; 02 Apr Bennett CA, JC, ND ... Late: 17 May Roberts CV; 17 May Charles Mix KP; 16 May Lincoln CA; 07 May Tripp RDO

Willet Early: 23 Apr Bennett RDO; 25 Apr Charles Mix KP; 25 Apr Hughes DB; 25 Apr Yankton RND; 26 Apr Edmunds and Faulk BP

Lesser Yellowlegs Early: 25 Mar Brown MO; 27 Mar Charles Mix RM; 05 Apr Marshall GO; 07 May Tripp RDO ... Late: 31 May Charles Mix KP; 18 May Potter and Hughes RDO; 17 May Roberts CV

Upland Sandpiper Early: 23 Apr Butte EK; 23 Apr Fall River RDO; 25 Apr Charles Mix RM; 25 Apr Yankton RND; 30 Apr Aurora CA, JC, KP

Long-billed Curlew Early: 02 Apr Oglala Lakota CA, JC, ND; 05 Apr Custer MMM; 15 Apr Meade ND

Hudsonian Godwit Early: **09 Apr Charles Mix KP**; 13 Apr Brown BP; 16 Apr Aurora RDO ... Late: 21 May Miner JSP; 21 May Lincoln CA; 21 May Charles Mix RM, KP

Marbled Godwit Early: 08 Apr Stanley KM; 09 Apr Brown BP; 14 Apr Faulk and Hyde SS; 23 Apr Bennett and Fall River RDO

Ruddy Turnstone Early: **30 Apr Brown BP**; 07 May Gregory RM; 14 May Aurora RND ... Late: 31 May Kingsbury JSP; 27 May Codington BP; 24 May Marshall GO; 18 May Potter RDO

Red Knot Early: **13 May Hughes DB, RDO** ... Late: 16 May Hughes RDO

Stilt Sandpiper Early: 01 May Potter KM, RDO; 03 May Charles Mix RM; 08 May Pennington JLB; 09 May Brown BP ... Late: 30 May Brown GO; 28 May Marshall GO; 27 May Codington BP; 22 May Tripp SS; 21 May Charles Mix RM

Sanderling Early: 28 Apr Stanley SS; 01 May Clay GJS; 01 May Sully RDO; 12 May Brown GO ... Late: 31 May Kingsbury JSP; 21 May Miner JSP; 21 May Charles Mix RM

Dunlin Early: 15 Apr Brown BP; 15 Apr Charles Mix KP; 16 Apr Brule RDO ... Late: 30 May Brown GO; 28 May Marshall GO; 27 May Codington BP; 21 May Charles Mix RM

Baird's Sandpiper Early: **12 Mar Brown BP, CV; 12 Mar Kingsbury JSP; 15 Mar Charles Mix RM**; 15 Mar Edmunds GO ... Late: 23 May Hutchinson KP; 20 May Aurora SS; 18 May Potter RDO; 18 May Douglas KP

Least Sandpiper Early: 15 Apr Charles Mix RM; 24 Apr Brown GO; 27 Apr Marshall GO; 08 May Pennington JLB ... Late: 24 May Marshall GO; 21 May Miner JSP; 21 May Lincoln CA; 21 May Charles Mix RM

White-rumped Sandpiper Early: 06 May Roberts CV; 08 May Clay DS, GJS; 09 May Brown BP; 22 May Tripp SS

Pectoral Sandpiper Early: 15 Apr Brown BP; 16 Apr Clay DS; 16 Apr Lake JSP; 22 May Tripp SS ... Late: 27 May Codington BP; 23 May Hutchinson KP; 23 May Brown BP; 21 May Charles Mix RM

Semipalmated Sandpiper Early: 09 Apr Charles Mix KP; 13 Apr Marshall GO; 15 Apr Brown BP; 15 May Pennington RSL ... Late: 27 May Codington BP; 24 May Marshall and Brown GO; 22 May Tripp SS; 21 May Charles Mix RM

Short-billed Dowitcher All Reports: 06 May Brown BP; 14 May Hyde CV et el; 15 May Hyde SS

Long-billed Dowitcher Early: **17 Mar Charles Mix KP**; 11 Apr Brown GO; 16 Apr Aurora RDO; 23 Apr Fall River RDO ... Late: 22 May Tripp SS; 21 May Douglas SS, KP; 21 May Charles Mix RM

Wilson's Snipe Early: 21 Mar Charles Mix KP; 26 Mar Lincoln CA; 26 Mar Minnehaha DC; 08 Apr Meade EEM

American Woodcock Early: 14 Mar Brown BP; 22 Mar Lincoln CA; 25 Mar Roberts MO; 19 May Walworth KM

Wilson's Phalarope Early: 03 Apr Union GJS; 15 Apr Charles Mix KP, RM; 16 Apr Sully KM; 23 Apr Kingsbury KP; 24 Apr Pennington JLB

Red-necked Phalarope Early: 11 May Potter and Sully RDO; 12 May Brule and Stanley SS; 13 May Brown MO; 15 May Pennington RSL ... Late: 27 May Codington BP; 22 May Pennington JLB; 18 May Potter RDO

Bonaparte's Gull Early: 19 Mar Charles Mix RM; 26 Mar Buffalo SS; 26 Mar Hughes KM; 02 Apr Miner JSP ... Late: 15 May Aurora CV; 05 May Stanley RDO; 29 Apr Roberts CV

Franklin's Gull Early: 03 Mar Charles Mix RM; 07 Mar Clay DS; 30 Mar Hughes RDO; 01 Apr Turner CA, JC; 17 Apr Bennett RSL

Ring-billed Gull Early: 01 Mar Hughes RDO; 02 Mar Pennington ND; 03 Mar Charles Mix RM; 03 Mar Stanley RDO; 05 Mar Lake JSP; 05 Mar McCook CA

California Gull Early: 01 Mar Hughes RDO; 08 Mar Stanley RDO; 13 Mar Pennington JLB; 27 Mar Edmunds BP, SS

Herring Gull Early: 01 Mar Hughes and Stanley RDO; 03 Mar Charles Mix RM; 07 Mar Lake JSP; 10 Apr Fall River ND ... Late: 01 May Stanley RDO; 29 Apr Gregory JC, CA; 28 Apr Hughes DB; 08 Apr Minnehaha CA

Thayer's Gull Only Report: 01 Mar Hughes RDO
Iceland Gull Only Report: 01 Mar Hughes RDO
Lesser Black-backed Gull reported 05 Mar Hughes KM; 20 Mar Walworth RDO; 26 Mar Minnehaha CA, DC; 27 Mar Minnehaha DC; 21 May Stanley DB
Glaucous Gull Only Report: 08 Mar Stanley RDO
Great Black-backed Gull reported 06 Apr Stanley RDO; **21 Apr Hughes RDO**
Least Tern All Reports: 30 May Charles Mix and Gregory RM
Caspian Tern Early: **08 Apr Stanley RDO**; 26 Apr Charles Mix RM; 26 Apr Hughes RDO ... Late: 14 May Stanley DB; 29 Apr Charles Mix RM; 28 Apr Yankton RND; 28 Apr Hughes SS, DB; 28 Apr Charles Mix RM
Black Tern Early: 30 Apr Miner JSP; 30 Apr Pennington JLB; 11 May Roberts CV; 12 May Charles Mix RM
Common Tern Only Report: 15 May Aurora KP, RDO
Forster's Tern Early: 16 Apr Brookings CV; 16 Apr Lake JSP; 16 Apr Minnehaha CA, JC; 16 Apr Sully KM; 08 May Pennington JLB
Mourning Dove Early: 01 Mar Clay GJS; 07 Mar Brown GO; 12 Mar Lake JSP; 12 Mar Roberts CV; 20 Mar Pennington RSL

FLEDGLING TRACTS

JASON THIELE

Guest Column: *A Birder Begins* by Peter Binstock

People often ask me how I started birding.
It's simple: I received a bird guide!

Cooper's Hawk, McKennan Park, Sioux Falls
Photo: Peter Binstock

I have always been interested in animals. As a younger kid I refused to wear a shirt without an animal on it. As I got older, I started to identify some animals and a few plants. I knew lots of the basic birds: Red-tailed Hawk, American Robin, Northern Cardinal, Blue Jay, and so on. Then, for my eleventh birthday, I got that bird guide of the Dakotas. It was a good starter guide, but I started to see birds that were not in my book and I was very confused (spring migration was really hard for me.) When I discovered Cornell Lab of Ornithology, I was amazed at how many more birds there were out there. And...I could listen to sounds now! This took my birding skills to a new level.

(Later on I discovered the National Audubon Society and eBird.)

One day I read about the Detroit Lakes Bird Festival in Minnesota. I really wanted to go; I begged and begged and finally my dad signed us up. The car ride there felt like forever. We finally got there. My first field trip was to the Felton Prairie, where I met another young birder. He's a couple of years older than me but it was still cool. My other two field trips were to Tamarack National Wildlife Refuge (my favorite) and Itasca State Park. I got 44 Lifers! That's almost a quarter of my Life List. I highly recommend going to the Detroit Lakes Birding Festival.

Pygmy Nuthatch, Near Custer, SD

At the end of June, I finally joined the Sioux Falls Bird Club. I was psyched for my first field trip, which was July 16, 2016. I met many amazing birders, including another young birder my age. So far, I have learned a lot from all of them. Now I LIKE the Sioux Falls Bird Club on Facebook and have an addiction to constantly looking at the schedule on their website.

[I want to warmly welcome Peter to our circle of field ornithologists in South Dakota. Peter is 12. ~Ed.]
